Customer Reviews

It is a fine pice of art, a nice collector for the coins, they fit perfect and is has some information related to each coin and the state.

Sturdy construction, bright colors. It's great for the kids. It's technically a two fold with a thin laminated sheet that folds over to prevent the coins from hitting each other. That thin sheet has a lot of data and facts on it like when the state joined the US and the origins of the state name. The slot for the coins has a punch out that needs to be removed before the coin can be inserted. That punch out has the state name, year of statehood, and the capital of the state on it. I am trying to devise a way to use those quarter sized punch outs in some sort of game to teach the kids the state capital for each state. It's great to find a use for something that was probably meant to be trashed or recycled.

This is a sturdy, well-made map for a collection of U.S. State Quarters. The openings for the coins are cut but the cardboard plugs are still in place, which I think makes the map look nicer as it's being filled.

Kid loves it. Nice high gloss graphics, stiff construction. Good educational tool for states locations, etc. quarters fit nicely.

The state names are not shown, not easy to know immediately which state you are looking at.

I have another larger Statehood Quarters map that I purchased while these were being issued. My husband recently started collecting these quarters for an interested friend who is in Thailand. I was very pleased when we received this "book". It not only displays them on a US map, as mine did, but it's smaller, less bulky and easier to store - and in this case, mail. Very nice product!

Good product as described!

Very satisfied !
