Bob Blitzer is a native of Manhattan and received a Bachelor of Arts degree with dual majors in mathematics and psychology (minor: English literature) from the City College of New York. His unusual combination of academic interests led him toward a Master of Arts in mathematics from the University of Miami and a doctorate in behavioral sciences from Nova University. BobÃ¢ â¬â„¢s love for teaching mathematics was nourished for nearly 30 years at Miami Dade College, where he received numerous teaching awards, including Innovator of the Year from the League for Innovations in the Community College and an endowed chair based on excellence in the classroom. In addition to College Algebra, Bob has written textbooks covering developmental mathematics, introductory algebra, intermediate algebra, trigonometry, algebra and trigonometry, precalculus, and liberal arts mathematics, all published by Pearson. When not secluded in his Northern California writerÃ¢ â¬â„¢s cabin, Bob can be found hiking the beaches and trails of Point Reyes National Seashore and tending to the chores required by his beloved entourage of horses, chickens, and

irritable roosters.

This book was about 30-40 cheaper than offered on my university's website, it is expensive but needed for a course. I looked for this book on other websites and provided the best deal. I am in still in the class but this book is doing its purpose.

Bought this to use w/ WGU's pre-calculus/trigonometry course. It works well, but I still need to watch Youtube videos for some extra help.

Too disjointed in the organization of topics, concepts. Problem sets were good!

Size of book seems daunting, but once you get into it and see the in-depth examples and explanations you will understand why it is so large. You will find it a treat and asset if your professor is using this book. Thank goodness shipping was so quick - arrived just in time for first day of class. You might like the companion solutions manual. Worked-problems are very easy to follow.

Just as described, the way it should be.

Its the books I needed!!
