Customer Reviews

I passed my PCCN in December 2015 using this book and the AACN review course. The questions in this book are really good for preparing for the exam; however, the questions online are the same as in the book. That's handy, but, I wish that the online questions were different so that there would be more of a variety. What I like about the review questions being online was that I could pull it up on my tablet and take it with me one the go. It's easier to do the questions online as opposed to in the book because it will give you the rationale right away and you don't have to flip to the back of the chapter to look up the rationale for each question. I wish that I had just bought online access as opposed to the book, since that's just what I used a majority of the time. But, it's fun to have the book to get your friends to practice on you.

This was a great tool for studying for the 2015 PCCN; however I wouldn't just use this book. It's a lot

more difficult than the test itself and goes into too much detail on certain systems where it doesn't need to (i.e. the test explains that only 5% of the whole test will be on endocrine and focusing on DKA - so it gets distracting when this review has 82 questions focused on feed-back systems). Grab this book as a supplement! But not as your only source of questions. The more questions you look through the better! Good luck!

This book has plenty of sample test questions, but no actual review overview. I learned this upon receiving the product, but opened up the access code available with the book thinking there might be some kind of online review. The online version was unfortunately the same as the book. I returned the product but only received a partial refund.

Really liking this book! Cardiac questions are really good! Rationales are great and very informative! Would recommend to anyone taking the PCCN!!

Satisfied!

Great book, very comprehensive and lots of Info.

lots of questions on sections of the body systems and answers mostly with rationales.

need to review a lot!!!
