Weed Ecology In Natural And Agricultural Systems (Cabi)

Synopsis

Ecology is central to our understanding of how and why weeds invade and yet there are few books that link introductory weed science texts with more advanced ecology books. This textbook introduces ecological principles to students interested in weed science and weed management. It includes examples from the weed and invasive species literature to illustrate the ecological principles discussed. It is suitable reading for final year undergraduates and graduates.

Book Information

Series: Cabi

Paperback: 320 pages

Publisher: CABI; First edition (February 28, 2003)

Language: English

ISBN-10: 0851995284

ISBN-13: 978-0851995281

Product Dimensions: 9.5 x 0.8 x 6.7 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Customer Reviews

"As an undergraduate text [the book] does a superb job of traversing the wide expanse of ecology... several chapters should be key components of any course on understanding weed ecology."

(Biological Invasions)"The information is provided in short chapters, which are very well written, have their own comprehensive reference lists, and contain many excellent examples from around the world. The book will be an extremely valuable textbook for undergraduate and graduate students studying weed science and agriculture." (Biological Agriculture and Horticulture)

Barbara D. Booth, Department of Plant Agriculture, University of Guelph. Stephen D. D. Murphy, Department of Environment and Resource Studies, University of Waterloo. Clarence J. J. Swanton, Department of Plant Agriculture, University of Guelph.
