Customer Reviews

Grade 2-4-Written in simple language and sentences, these slim titles offer straightforward explanations of how things work. Starting with the basics, the material gradually builds upon readers' growing understanding of the concepts presented. The experiments suggested can be performed with little assistance and with materials found in the home. Clear, distinct, color photos of children demonstrating the activities on each page help reinforce the concepts, as do the many drawings and diagrams. Children will find these accessible titles informative, and may see their

world in a different light after reading them. The narrow focus of each title may serve a purpose for classroom units. Susan Shaver, Hemingford Public Schools, NE Copyright 2002 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.
