Customer Reviews

Finally, a Star Trek: The Next Generation that takes place in the "mirror" universe that's not bogged down with cliches and is extremely interesting, Can't wait for upcoming releases in its continuation!

5 *****!

Loved the art and story however I have one critical question. Was the reproduction of the art set to reduce the color? The colors don't seem as vibrant as they would be with more traditional digital colors. Other than that, the story was something that we would see in a movie. All the characters had their true voices. It's like the writers really did their homework to capture the look and feel of

Next Gen as if it never left the air ways.

When I read the comic I got from free comic book day I was impressed now to have read this issue its an interesting take on the next generation and wonderful also can't wait for the next issue

This series answers the question "what if the Federation was not so peaceful? " This series also takes the next generation to a whole new level. It is nice to have some new reading.

I wonder what will happen if they break through the terrain rebellion on the other end and access the Defiant specs.

Always loved the mirror universe when it came to star trek and so glad to see it brought back with Picard!

Wish they would have done a couple episodes of this in TNG but this is the next best thing.
Awesome!!!!

Excellent series so far!
