Synopsis

Do you like to solve riddles, puzzles and brain teasers? Do you think outside the box? Are you creative? Do you like to be challenged? If you answer yes to any of these questions then this book is for you! In this book you will be captured by pirates, measure time through burning a rope, look at a 4-dimensional cube, be involved in a gun duel, decide how to cross a bridge, journey through a desert, play poker and be abducted by aliens! This book is a collection of 100+ riddles and brain teasers to test your mathematical intuition. They are mostly quantitative in nature with some logic puzzles to challenge your lateral thinking capabilities. Don't worry you do not have to be a math genius to attempt these, just some standard mathematical knowledge is enough to get you through. There is no word play or trick questions, these riddles come with definite and satisfying answers. Many of these puzzles have been asked by top blue chip companies for job applications and so they are good practice for technical interviews. There are hints provided to guide you if needed and a comprehensive solution for each answer. Bonus related material are also included which touches on a wide variety of interesting topics including physics, philosophy and paradoxes! This book is ideal for those aged 16+ with puzzles ranging from easy to hard difficulty. Even if you are a beginner level, it is a fun and exciting read, the solutions provided will challenge the way you think.
