Nursing Pharmacology (Quick Study: Academic)

Synopsis

Having proficient knowledge of medical drugs and their effects on the human body is an especially important part of a nurse's duties. Therefore, nursing students or those already practicing will find much to learn from when using our newest 3-panel guide. Color-coded sections feature comprehensive information on different types of drugs, their uses, how they're administered and any possible side effects. It's a fluff-free reference tool guaranteed to become a nurse's best friend.

Customer Reviews

I just took my NCLEX and am very glad I used this to prep. It groups meds by classification, and has interactions and nursing considerations. Highly recommend using this. You can do it!

I think this is really helpful. It is short and to the point but is a good base of information. I got this to help me study for my HESI for Pharmacology. I think it is worth getting for an over view of the information. This will help me with my NCLEX as well!

I needed this thank you, it is very helpful.

Great reference, very easy to read.

It's okay

Ok if you have time to scan the whole thing. Categories could be bigger to define. More pages perhaps folded completely alphabetical would be an improvement.

If you don't feel like carrying a big pharmacology book to your clinical rotations, and you don't have an iPhone to get free apps. Well this quick study pharm comes handy. I have an android phone, so I don't get the Nursing Central app for free. However, once you know your drugs classifications, just use this as a reference. Trust and believe me you'll be able to understand why your client is getting it, the side effects and even do your client teaching...

I bought many of these cards (in different subjects) from and they were a GREAT help in nursing school and now as a Nurse I find I refer to them all the time. Recommend highly!
