Customer Reviews

Very nice book

Nice way to relax!

The title is very deceptive. These are just common puzzles, and nothing to do with mysteries or 'whodonits'.

Great puzzles for upper elementary and middle school. We are using some of the puzzles for claim, evidence, and reasoning in science class. The puzzles are not too easy but not too hard so the kids won't give up too quickly

Being 38, I feel like my mind and memory is going faster than normal. This has been very fun to

keep me thinking and keeping my brain active. I usually love to play Sudoku, but wanted to switch it up a little bit. This book has been great. Hopefully it helps strengthen my brain preventing early on set Alzheimer's from affecting me (I feel like I am losing my mind/memory).
