## **Customer Reviews**

Ryan Hansanuwat is a registered Architect in two states, holds an NCARB certificate, is a LEED AP and has a Bachelor of Architecture and Master of Building Science degree. He serves as a Vice President of a small firm in Texas specializing in light commercial, interior design and building science. His work has received numerous awards and distinctions and he has been published in multiple trade publications.

Got this for my granddaughter who wants to be an architect. 8th grade. She loves it. Thought it was really helpful.

It was a basic definitional rundown of architecture and one could find more info about the ins & outs of actually being an architect by googling it.

As a recent graduate pursuing a career in architecture, I found this book incredibly informative. The breakdown of architecture positions, as well as architecture related fields is invaluable, and something I never really learned in college. I highly recommend this book to anyone who wants a comprehensive overview of the architecture field, especially college students who are trying to narrow down their career path.

I thought that Ryan had a lot of practical advice in his book. He tells you what you need to know to be successful in getting your foot in the door, and also how to advance once you do get your foot in the door. He also is frank about why people should be architects. He also doesn't pull any punches in regards to why you shouldn't be an architect as well. Very helpful.

excellent

As someone starting high school, I am reviewing all my options (currently between graphic, industrial design, and architecture) and I am starting to build my portfolio, this was extremely helpful not only to help me decide, but to see the career in a larger scale, mad to know what is required of me.

Having gone through the licensure process I wish this resource was available to me as well. This book lays out all the major pieces and steps to get to licensure while also asking relative questions. Will recommend to those with curiosities of our profession.

If you have the desire to become an architect this book is a great resource to get you started. The steps needed to obtain your goal is all spelled out for you in an easy & straight forward way in this book. Ryan has put together a very concise guide to follow to make your goal attainable. I highly recommend it .
