Urban Design

Synopsis

Fifty years ago a landmark conference at Harvard University established urban design as a distinct architectural and planning practice. Today, with the world's urban population surpassing three billion people, urban design has become more crucial than ever. Indeed, the concerns that initially brought leading architects and city planners together—including concerns over sprawl, pollution, and aging infrastructure—have only intensified over the past half century. In *Urban Design*, Alex Krieger and William S. Saunders have assembled prominent figures in architecture, planning, and landscape design to look back on the evolution of the discipline of urban design; assess the current state of the field; and anticipate the challenges posed by the unprecedented rate of urbanization, particularly in the developing world, and how the profession will need to adapt in order to confront them.

Book Information

Paperback: 320 pages

Publisher: Univ Of Minnesota Press (February 17, 2009)

Language: English

ISBN-10: 0816656398

ISBN-13: 978-0816656394

Product Dimensions: 6 x 1 x 9 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)

Customer Reviews

Fifty years ago a landmark conference at Harvard University established urban design as a distinct architectural and planning practice. Today, with the world's urban population surpassing three billion people, urban design has become more crucial than ever. Indeed, the concerns that initially brought leading architects and city planners together—including concerns over sprawl, pollution, and aging infrastructure—have only intensified over the past half century. In *Urban Design*, Alex Krieger and William S. Saunders have assembled prominent figures in architecture, planning, and landscape design to look back on the evolution of the discipline of urban design; assess the current state of the field; and anticipate the challenges posed by the

unprecedented rate of urbanization, particularly in the developing world, and how the profession will need to adapt in order to confront them. The volume opens with excerpts from transcripts of the 1956 Harvard conference followed by essays that contextualize and critique its assumptions and ambitions. Subsequent essays address such topics as the social conscience of urban design and stake out the competing sensibilities in the field, from New Urbanism to avant-garde. As humanity becomes an urban species to a degree that was unimaginable fifty years ago, this comprehensive volume seeks to encourage today's designers to draw on the energy and messy vitality of cities in shaping tomorrow's urban environments. Contributors: Jonathan Barnett, Denise Scott Brown, Joan Busquets, Kenneth Greenberg, John Kaliski, Timothy Love, Fumihiko Maki, Richard Marshall, Eric Mumford, Michelle Provoost, Peter G. Rowe, Edward W. Soja, Richard M. Sommer, Michael Sorkin, Emily Talen, Marilyn Jordan Taylor, Wouter Vanstiphout, Charles Waldheim.

Design and planning that grow out of dynamic conversation, and this book features dialogues between many current professionals in a variety of fields as they look at widely held and accepted standards of design and its footprint on our communities -- should we or shouldn't we do what we have done before? Time to really look AND listen. Good read.

Collection of essays that correspond well to each other. Excellent read.

I downloaded the Kindle edition of this book and it is poorly formatted: the footnotes are NOT LINKED. There is no reasonable way to find the footnotes and then get back to where you left off reading - for this reason, I find it impossible to read this digital edition.
