# Looking Up!: The Science Of Stargazing (Science Of Fun Stuff)

## Synopsis

Become an expert on the stars in the sky with this fact-tastic nonfiction Level 3 Ready-to-Read, part of a series about the science of fun stuff! Did you know that comets are sometimes called “hairy stars”? Or that if you saw a sunset on the moon, the sun would look white because the moon doesn’t have an atmosphere? You’ll learn this and much more as you become an expert on the objects in the sky. Plus, this book contains a special section in the back all about the August 2017 total eclipse of the sun that will be visible throughout most of the United States. Amaze your friends with all you’ve learned in this engaging, fact-filled Level 3 Ready-to-Read! There’s even a fun quiz so readers can test themselves to see what they’ve learned! Learning science has never been so much fun!

## Customer Reviews

Joe Rao serves as an instructor and guest lecturer at New York’s Hayden Planetarium. He writes about astronomy for Natural History magazine, the Farmer’s Almanac, Space.com, as well as many other publications. He is also an on-camera meteorologist for News 12 Westchester, New York. In 2015 he was voted “Best Local Television Personality” by the readers of Westchester Magazine. Joe was also nominated for an Emmy in 2004, 2006,

2010, 2014, and 2016 for On-Camera Achievement. Joe, his wife Renate, and their two children Joseph and Maria, reside in Putnam County, New York. Mark Borgions is an award-winning designer, illustrator, and animator. His illustrations have been published worldwide in advertising, editorial, and in children's books. He is also cocreator of a bestselling series of audio plays in his homeland of Belgium. As an animator, he creates motion graphics and character animation for clients across the globe. He lives with his wife and two kids in Antwerp, Belgium.

Good informative book, not only for the kids, but for the adults as well! I got it because it has a special section about the upcoming solar eclipse.

Great first astronomy book for children. Great section on the Solar Eclipse, August 21st 2017.

This book was a gift for my 7 year old nephew. When I asked how he liked it, he told me it was a lot of fun to read. His mom told me he enjoyed it, but she thought it may have been a little difficult for him. However, she said it did help improve his reading abilities and she also was happy with it.

This is a single book from a series of fantastic kids books. Super insightful, and worded carefully so that young minds and beginning readers can understand clearly. The reason I gave it only 4 stars is because it had a bunch of cool information that won't be entirely relevant after this year. Still, super happy to own it.

Purchased for my grandchildren. A colorful and educational book thanks sellers for sending it quickly

Since my east coast family was in the path of totality, this made a great introduction for the kids to enjoy and appreciate the experience

Great books for kids
