Medical Insurance: An Integrated Claims Process Approach

Synopsis

NOTE: This book does not come with an Access Code The sixth edition of Medical Insurance: An Integrated Claims Process Approach emphasizes the medical billing cycle—ten steps that clearly identify all the components needed to successfully manage the medical insurance claims process. The cycle shows how administrative medical professionals “follow the money.” Medical insurance specialists must be familiar with the rules and guidelines of each health plan in order to submit proper documentation, which then ensures that offices receive maximum, appropriate reimbursement for services provided. Each part of the book is dedicated to a section of the cycle followed by case studies to apply the skills discussed in each section. These case studies can be completed with the electronic CMS-1500 at www.mhhe.com/valerius6e or using simulated Medisoft exercises in Connect Plus, McGraw-Hill’s homework and assessment platform.

Book Information

Paperback: 656 pages

Publisher: McGraw-Hill Education; 6 edition (January 11, 2013)

Language: English

Nenna L. Bayes , AAS, BBA, M.Ed., CPC, has coauthored and reviewed various titles within the medical administrative fields. She earned an associate of applied business degree, a bachelor of business administration degree, and a masters of arts in education from Morehead State University. During her tenure, she has taught numerous courses within the administrative and medical administrative curriculum. She is a professor in and the program coordinator for the Office Systems Technology and Medical Information Technology programs at Ashland Community and Technology College in Ashland, Kentucky, and has received many teaching excellence awards. She is also a

certified professional coder (CPC). Prior to teaching, she worked in various medical office environments. Additionally, she is a member of the American Academy of Professional Coders (AAPC) and the American Health Information Management Association (AHIMA). She lives in Flatwoods, Kentucky, with her husband and is blessed to have two children and two granddaughters. She is actively involved in music and enjoys camping in her leisure time. Amy L. Blochowiak, MBA, ACS, AIAA, AIRC, ARA, FLHC, FLMI, HCSA, HIA, HIPAA, MHP, PCS, SILA-F, has over 16 years of insurance industry experience serving in various roles. Amy is currently the HCBS Program Director at Northeast Wisconsin Technical College where she sits on many committees and she shares her passion for student success. Cynthia Newby, CPC, CPC-P, is a long-serving author who works closely with McGraw-Hill Education instructional development staff to develop excellent MIBC programs. Cynthia is a graduate of Hood College and a trustee of that institution as well as her local animal shelter and library. --This text refers to an out of print or unavailable edition of this title.

This book was outdated for 2015-2016. It was a waste of money and I bought a used one.

I used this book for a Medical Coding class- just for rent! I came in handy! When I took the test, CPC(Certified Professional Coding), I didn't pass it the first time, but I will be Taking it on Dec 9, 2016, I'm sure to pass it Now!! I only missed it by a few! Its a good book to study!!

love it. Easy to follow and read, not filled with filler words, just what you need. I wish I had purchased the updated version, but it was too overpriced. My instructor allowed us to purchase this edition and it is still pretty much updated.

as the other book I bought my wife, it was in much better condition that stated. Good discount off mint new books. required for her courses, good way to save buying used. And it is barely even that, but savings are significant.

I recently began working for a health insurance company, and was looking for an overview of the business process before getting into the company specific implementations - this text was what I needed.

I used this book in my Medical Insurance course at college. It covered everything the teacher wanted it to and more. It was put in words that were easy to understand and concepts that were

understandable to comprehend. I would recommend this book for anyone going into the Medical Insurance Field.

I have to say for a textbook, it is pretty good. Very well presented material. I learnt far more from it than from the teacher that is for sure. Helped me passed the test, but never got a job in the field.

Thank yu for providing an opportunity to purchase required school textbooks cheaper than we can find at the bookstore. It's nice to be able to save money wherever we can. The book came exactly as I expected and quickly. Thank you. Me my expectations
