I think this is an excellent book for learning conversational Mandarin. As with any course, more depends on the instructor. My disappointment, which probably does not apply to 95% of users, is that it discusses very little about the written language and the characters used are Simplified rather than Traditional Chinese. So if you plan on Taiwan, Macau, or Hong Kong, probably not the best book, but definitely much better than average.

It's for beginner who wants to study spoken Chinese. It's difficult to follow the audio with the text for beginner though.

This book was required for a University of New Mexico Chinese language class, but was marginally useful in that class for two major reasons: the CD index as well as most other instructional material was in Mandarin (both hǎfâ nzǎfâ and pinyin)! If I knew enough Mandarin to fully utilize this book, then I wouldn't have needed it to start with!.The CD did play on my PC, but I spent a lot of time having to correlate tracks to text lessons and marking up the book with each track number at its relative lesson.

Useful situations, good methodology.

A very good book for the beginning chinese learner. Contains very useful basic vocabulary words and phrases for day to day living (e.g. ordering food at a restaurant). See the description for the various topics. I recommend this for beginners who are already in China or about to move to China. If you are past that stage and are in the upper beginner or intermediate level this book will not be very useful. If you are studying Chinese outside of China and are not planning to head immediately there, I would recommend a book or course that is more comprehensive that incorporates character learning more. Do not recommend to those who want to study traditional chinese characters.
