## Customer Reviews

Nobody covers the world like Lonely Planet.' --New York Post, May 2004

First - Borneo was the most fantastic trip that I've been on in my life. It's very raw and less developed for tourists.. it's not the easiest travel, but definitely worth it for the avid adventurer.I chose this book because of the reviews on that the newer version was 'incomplete'. I was happy with it. I spent some time in Sarawak (around Kuching and Bako National Park) and then headed to Kalimantan and Tanjung Puting. This book was definitely useful in planning travel and choosing some great spots to visit. Recommended!

As far as going to Malaysia is concerned, I'm an armchair traveler. I've been to many countries but

never here. I checked this out just out of interest. Covering areas like Sabah, Jakarta, Kota Kinabalu, Tutong, and others, the book seems to be a pretty handy guide if you're going there. The book tells how to get to these places, even shopping and location of toilets. There is a chapter on history and one on customs. How to get around, the National Park, shopping, hotels and where to eat, it's here. There are plenty of maps in the text, a few color photos in the front.

Borneo is the third biggest island in the world. Diverse in flora and fauna, inhabited by indigenous peoples who have inhabited the island for over 40,000 years as well as by more recent migrants there is something in Borneo for everyone. This compact book contains information about the history of Borneo, its geography and its cultural traditions. But wait: Borneo is not a homogeneous whole. It consists of the Indonesian State of Kalimantan, the Malaysian states of Sabah and Sarawak and the tiny oil-rich sultanate of Brunei. Borneo is resource-rich but is losing its rich primary tropical rainforest as logging operations expand. This has its own set of environmental impacts. So, you'd like to travel to Borneo and perhaps to climb Mt Kinabalu? Or are you interested in jungle trekking or diving? Or maybe you'd like to combine all of these activities as well as having a relaxing holiday? Or perhaps you'd just like to read a little about what Borneo has to offer? Regardless of your plans, the Lonely Planet guide to Borneo is a great starting point. Full of maps and useful information for the seasoned and new traveller alike, this guide provides a lot of information and lets you know where to find more. When you pack your bag, don't forget your leech socks! Jennifer Cameron-Smith
