This new edition has been revised throughout to make the story even more compelling. And drawing on the extensive correspondence the authors have received over the years, they have added a section that outlines the many ways that readers have been using *Leadership and Self-Deception* to improve their lives and workplaces—areas such as team building, conflict resolution, and personal growth and development, to name a few. Read this extraordinary book and discover what millions already have learned—how to consistently tap into an innate ability that dramatically improves both your results and your relationships.

President and CEO, LensCrafters Â“This book is a rare gem that is treasured by all who have read it. The organization for which I work has passed this book to so many people, and it is amazing to watch peoplesÂ¢ attitudes and behaviors towards each other changing. Each day everyone gives a little more, making us better leaders but more importantly better people.Â• Â•Nuala Murphy, Senior Vice President, Global Financial Services

CompanyÂ“Leadership and Self-Deception holds up a brutally honest mirror to behavior in which we all indulge to justify our shortcomings. The result is not self-remorse or punishment but a glimpse of a life to be lived with integrity and freed of the boundaries and constraints we inflict upon ourselves and others. I am always excited to watch ArbingerÂ¢s thinking help my clients to unlock painful family disputes and lead them to resolution.Â• Â•Neil Denny, family lawyer, Wiltshire, UK Â“A remarkable book. It can be valuable to your understanding of why so many people create their own problems, are unable and/or unwilling to see that they are creating their own problems, and then resist any attempts by others to help them stop creating those problems.Â• Â•Robert Morris, Top 50 Reviewer Â“IÂ¢ve been in the book publishing business for twenty five years. Rarely have I read a book as profound and life-changing as Leadership and Self-Deception.Â• Â•David Sanford, Literary Agent, Credo Communications Â“This book was recommended to me at an annual strategic planning session. I was stunned by the truth of it and the simple solution. Our entire management has now read it. It has been a building block for our personal and organizational development.Â• Â•Rick Chalk, CEO, Cal-tex Protective CoatingsÂ“My business partners and I built a health-care company on the ideas in this book. We are amazed at what it has helped us achieve. Careful reading and rereading of this book has proven better than any productivity, team-building, or leadership training weÂ¢ve encountered.Â• Â•Mark Ballif, CEO, Plum HealthcareÂ“An important book that has the potential to change the way you think, behave, and live your life, both personally and professionally.Â• Â•Rolf Dobelli, Top 50 Reviewer Â“Our Executive Committee read Leadership and Self-Deception nearly two years ago. Since then every member of our staff has read it. The Arbinger approach adds tremendous value as we grow the company and integrate companies we acquire along the way.Â• Â•Robin Hamill, Chairman, Igility Group

Leadership and Self-Deception uses an entertaining story about an executive facing challenges at work and at home to expose the precise psychological processes that conceal our true motivations and intentions from us and trap us in a Â“boxÂ¢ of endless self-justification. Most

importantly, the book shows us the way out. The book's central insight is that the key to leadership lies not in what we do, but in who we are. It has proved to have powerful resonances not only for organizational leadership, but in readers' personal lives as well. This new edition has been revised throughout to make the story more readable and compelling. And drawing on the extensive correspondence they've received over the years the authors have added a section that outlines the many ways that readers have been using this book.

This is a fascinating book, written in narrative form that works pretty well. The concept is powerful but the narrative gets a bit cute at times. It's a book I'm going to need to re-read a couple of times for the concept to become "imprinted" into my thinking. The approach it suggests is applicable to companies, nonprofits and even individuals.

This is a tough, tough book to read. What if I've gotten so many of the "rules" of achievement and success just plain wrong? Can I change a comfortable mindset? Will it really work? This is a short read with a very long tail. You won't like it, but neither will you forget it!

Leadership and Self-deception is a quick read that leaves the reader questioning their attitude toward life in general. The theme of the book is basic, but the methodology of how the theme is portrayed is what shines in this book. The real-life examples allow the reader to put them-self in those situations to judge how they are performing accordingly. It is a great read for people who desire to maximize their results at home or work by revealing the best methods to remove self-deception.

Leadership and Self Deception is one of the greatest books ever published. That might seem to be far reaching, but it isn't. I first read it about 15 years ago, and it changed my whole outlook on other people, and in particular my clients and coworkers. But it helped at home too. I began to view others in a different light, and treat others in a way that honored their goals in conjunction with mine.

This book is another great product from the Arbinger Institute. I have been so impressed with the messages in this book. It is a fun read and so packed with valuable insights. A must read!

This book is very inspiring and life changing. I read it for a project management class at my university and I read it in a day (and I'm not much of a reader). It's very short and an easy read and

if you really take time to ponder what is being taught, it really will change who you are and the way you view other people. Absolutely buy this if you are thinking about it.

So many books promise to deliver information that will change the way organizations or families or individuals lead their lives. Most don't attend to all three, however Leadership and Self-deception does present a model of human interaction that can be considered a unifying theory for how we can live successfully in any area of our lives. Recommended by a client who I could see had made a major positive change in both his personal and work life, this book called for my attention. The narrative story format may surprise people as a form of delivery, but I find that story is one of the best ways to help people connect concept with personal experience. The concepts and model here are challenging in that they ask us to face things about ourselves that aren't necessarily comfortable. Even just to try them on can cause "squirminess"! But the moments of discomfort can change our perceptions and positions that we're holding onto and with that we might free ourselves of what has been limiting our success. I think that makes for a good book and time well spent.

This book was recommended by a leadership coach to a group of senior govt execs looking to raise their game to the next level. I'm generally not a fan of the story style, but the essence of the message of this book is compelling. I would have preferred to see a little more depth of material on applying this approach, but still believe it's worth the few hours it takes to read. If you are willing to be open to the core message, and perhaps share the reading with coworkers, there is real potential for bringing our most authentication selves to the work place.
