Customer Reviews

Thank you Michael Dahl, for getting my daughter to say please & thanks! We bought this book, along with "Bear Says Thank You," in a hope to teach my 2 year old manners. It worked! She loved the books and had me read them over and over again to her. It's now been 2 years since we purchased, and sometimes we have to remind her, but for the most part she still remembers her "pleases" and "thank yous." And, she still love the books!

Love these books and I'm sure we have almost every one of them by now. These are easy for my daughter to follow along with and learn from. Started reading these to my daughter when she started biting at about a year and she's been picking different books from this series for the past 8 months when it's story time.

Cute book. My daughter (20 months) likes reading this one over and over, but still loves the polar bear one saying thank you better than this one. It's pretty cute and gets the point across.

This is a very simple book that is excellent for encouraging your toddler to say "please." There really isn't much of a story-- at first Penguin is demanding things without saying please, then his mom tells him he must say please, then he repeats his requests saying please. Nonetheless, my daughter LOVES this book and is happy to read it many times in one sitting. I have been working on teaching her to sign "please" and after signing it with her throughout several readings, now she knows the sign! I'll definitely be purchasing more books from this series.

While this book hasn't yet gotten my toddler (who has been signing for a while but just started speaking) to actually say or sign please, now she smiles and nods when I ask, instead of becoming infuriated. I don't know what the heck she thought "please" meant, but she would go bananas whenever I'd encourage her to say it. Since she really loves the illustrations (especially when the penguin is upside-down), I'm hoping she'll come around to actually *saying* please pretty soon, but since this has eliminated the mini "please"-based tantrums, I'm calling it a win. Very sturdy book, bright colors, sweet illustrations, small enough to pop in the diaper bag, short enough to read in a minute or two if the kid wants several encores.

my 18-month-old is loving this Hello Genius series, and we have the entire set. This is one of the latest to join us. Since she's learning how to speak, I thought that learning manners would be a good thing to add to her vocabulary, and purchased this book. It helps that she likes penguins -- the bossy little penguin in the beginning of the story is gently chastised by his mommy, and learns to preface requests with "please" rather than just demanding things. Simple story. Good for short toddler attention spans. And after a few reads, she started attempting to say "please" when asking for snacks or stories to be read to her!

Cute book, but there are better ones in this series. Bear says thank you and Little Tiger Picks Up are better story lines. I don't think this one is as helpful as the other two we own.

OMG my daughter is 18 months and I she makes me read this book over and over and over all day long! She loves it! It is a super cute book. Short and simple and keeps a young child's attention
